

## **Village Appreciates Flood Damage Assessment Survey Responses**

Orland Park, IL – The Village of Orland Park appreciates the input from residents who participated in the Flood Damage Assessment Survey conducted in late April. Approximately 175 residents responded with information ranging from sump pump malfunctions to concerns with overland flow of water. All responses are currently being reviewed and those that require village investigation will be evaluated by the Public Works Department in the coming weeks.

Village residents' participation in the survey will help Cook County provide valuable information as requested by the Federal Emergency Management Agency (FEMA).
