

## **Follow Odd/Even for Outdoor Water Use 'Til Sept 15**

The Village of Orland Park's Water Conservation Program is in effect year-round. From May 15 through September 15, outdoor water may be used from 7 to 11, both a.m. and p.m., according to the odd/even address system.

From May 15 through September 15, Orland Park's water conservation efforts are furthered with the village's odd/even address restriction. All outdoor water usage – lawn sprinkling, washing cars, watering flowers, etc. --- is limited according to the address of the building, both business and residential.

Homes and businesses with addresses ending in 0, 2, 4, 6 or 8, may sprinkle between 7 a.m. and 11 a.m. or 7 p.m. and 11 p.m. on even-numbered days only.

Homes and businesses with addresses ending in 1, 3, 5, 7, 9 may sprinkle between 7 a.m. and 11 a.m. and 7 p.m. and 11 p.m. on odd-numbered days only.

Regulated outdoor water use includes, but is not limited to all lawn and garden sprinkling by hose-fed sprinklers or underground irrigation systems for residential and commercial properties, all non-commercial car washing, residential pool maintenance and other similar uses.

According to the University of Illinois Cooperative Extension Services, lawns are equipped for hot, dry conditions. Instead of wilting and dying like many plants, they simply go dormant if they've been established for a year.

In general, cool-season grasses need about one inch of water per week to maintain green color and active growth.

Those violating the village's water usage provisions are subject to fines of \$750 for each offense. Each day of violation and each violating location shall be considered a separate offense.

Orland Park's Water Conservation Program is a necessary part of managing the Lake Michigan Water that the village receives from the City of Chicago via the Village of Oak Lawn.

The Village of Orland Park provides water to more than 22,000 homes and businesses which use an average of 6.5 million gallons of water every day. Consumption can reach as high as 17 million gallons during peak days in the summer.

Because of the dramatic rise in consumption during the warm summer months, it is critical that adequate storage be maintained to ensure safe drinking water and emergency capabilities. Changing weather conditions may require additional conservation measures. Residents will be notified of any adjustments to the conservation hours.

For more information, visit the village's website at [www.orland-park.il.us](http://www.orland-park.il.us) or call the Public Works Department at 708/ 403-6350.
