AN ORDINANCE AMENDING THE ORLAND PARK VILLAGE CODE BY AMENDING TITLE
6, CHAPTER 2, SECTION 2-12

VILLAGE OF ORLAND PARK

STATE OF ILLINOIS, COUNTIES OF COOK AND WILL

Published in pamphlet form this 3rd day of October, 2006 by authority of the President and Board
of Trustees of the Village of Orland Park, Cook and Will Counties, Illinois.

VILLAGE OF ORLAND PARK

Ordinance No: 4192

AN ORDINANCE AMENDING THE ORLAND PARK VILLAGE CODE BY AMENDING TITLE 6, CHAPTER 2, SECTION 2-12

WHEREAS, the President and Board of Trustees of the Village of Orland Park find as follows:

- A. Secondhand smoke, which contains 4,000 chemicals, 63 of which cause cancer, is the third leading cause of preventable death in the United States, and the National Cancer Institute determined in 2000 (Monograph #10) that secondhand smoke is responsible for the early deaths of as many as 65,000 Americans annually.
- B. Numerous studies have found that tobacco smoke is a major contributor to indoor air pollution, and that breathing secondhand smoke (also known as environmental tobacco smoke) is a cause of disease in healthy nonsmokers, including heart disease, strokes, respiratory disease, and lung cancer.
- C. The Public Health Service's National Toxicology Program has listed secondhand smoke as a known carcinogen (U.S. DHHS, 2000, citing Cal. EPA, 1997).
- D. The ills of smoking and secondhand smoke are well documented in all of the independent medical studies and secondhand smoke is particularly hazardous to elderly people, individuals with cardiovascular disease, and individuals with impaired respiratory function, including asthmatics and those with obstructive airway disease.
- E. Children exposed to secondhand smoke have an increased risk of asthma, respiratory infections, sudden death syndrome, developmental abnormalities, and cancer.
- F. The Americans With Disabilities Act, which requires that disabled persons have access to public places and workplaces, deems impaired respiratory function to be a disability.
- G. (1) The U.S. Surgeon General has determined that the simple separation of smokers and nonsmokers within the same air space may reduce, but does not eliminate, the exposure of nonsmokers to secondhand smoke; (2) the Environmental Protection Agency has determined that secondhand smoke cannot be reduced to safe levels in businesses by high rates of ventilation; (3) air cleaners, which are only capable of filtering the particulate matter and odors in smoke, do not eliminate the known toxins in secondhand smoke; (4) American Society of Heating, Refrigerating and Air Conditioning Engineers (ASHRAE) bases its ventilation standards on totally smoke-free environments because it cannot determine a safe level of exposure to secondhand smoke, which contains cancer-causing chemicals, and ASHRAE acknowledges that the technology does not exist that can remove from the air chemicals that cause cancer.

VILLAGE OF ORLAND PARK

Ordinance No: 4192

H. A recently promulgated ASHRAE Position Document on Environmental Tobacco Smoke concludes that, at present, the only means of eliminating health risks associated with indoor exposure is to ban all smoking activity.

I. The ASHRAE Position Document further concludes that no current ventilation, air cleaning or other technologies have been demonstrated to control health risks from environmental tobacco smoke exposure in spaces where smoking occurs.

J. A significant amount of secondhand smoke exposure occurs in the workplace, and employees who work in smoke-filled businesses suffer a 25% to 50% higher risk of heart attack and higher rates of death from cardiovascular disease and cancer, as well as increased acute respiratory disease and a measurable decrease in lung function.

K. Smoke-filled workplaces result in higher worker absenteeism due to respiratory disease, lower productivity, higher cleaning and maintenance costs, increased health insurance rates and increased liability claims for diseases related to exposure to secondhand smoke.

L. Numerous economic analyses examining restaurant and hotel receipts and controlling for economic variables have shown either no difference or a positive economic impact after enactment of laws requiring workplaces to be smoke-free.

M. Creation of smoke-free workplaces is sound economic policy and provides the maximum level of employee health and safety.

N. Smoking is a potential cause of fires, cigarette and cigar burns and ash stains on merchandise and fixtures, and contributes to the economic damage of businesses.

O. That the purposes of amended Section 6-2-2-12 as hereinafter set forth are (1) to protect the public health and welfare by prohibiting smoking in all public places and places of employment, and (2) to guarantee the right of nonsmokers to breathe smoke-free air which shall have priority over the desire to smoke.

NOW, THEREFORE, BE IT ORDAINED by the President and the Board of Trustees of the Village of Orland Park, Cook and Will Counties, Illinois, as follows:

SECTION 1
