A.D.A.

The Village of Orland Park Recreation Department advocates for full participation under the Americans with Disabilities Act (ADA). A request for ADA modifications or assistance at a program is required at the time of registration. Please mark the ADA box on the registration form. Early registration, along with a request for accommodation, is strongly suggested to assure that appropriate modifications are secured prior to the start of the program. At least two weeks is needed to have modifications in place. Every attempt at reasonable modifications will be made so that individuals may participate in a desired program. It may not be possible for the participant to attend the program until modifications are provided.

INCLUSION

The Village of Orland Park Recreation understands that not every person with a special need or disability condition requires or desires special recreation programming. The Recreation Department welcomes participation in all programs by individuals with disabilities and special needs. The Special Recreation division provides inclusion aides to assist the participant with the program activities and will make reasonable modifications to make sure it is an optimal experience for the individual.

ATLANTO-AXIAL INSTABILITY

AAI is a medical concern which requires programming precautions that may affect participation in specific programs that require extensive neck movement. If your child has Down Syndrome and you would like more information regarding Atlanto-Axial Instability, you can go to the National Down Syndrome Society (NDSS) website at www.ndss.org and click on Healthcare Associated Conditions. There you will find information on AAI.
