## RESIDENT NOTIFICATION OF CONSTRUCTION FOR THE FERNWAY SUBDIVISION ROADWAY AND DITCH GRADING IMPROVEMENTS PROJECT

---

August 11, 2016

Dear Resident:

This is the first in a series of newsletters that will keep you informed about construction activities in the Fernway Subdivision on the following Village Streets: **See Attached**

### **Impacted Streets**

- Robinhood Drive: From 167<sup>th</sup> Street to 171<sup>st</sup> Street
- 167<sup>th</sup> Place: From 88<sup>th</sup> Avenue to East of Robinhood Drive.

Newsletters will be mailed or hand delivered depending upon the urgency of the message. Notices and other information will also be available through the Village's website: [www.orland-park.il.us](http://www.orland-park.il.us)

The project will include the replacement of deteriorated or nonfunctioning drainage culverts under driveways and streets. Ditches will be graded to improve the drainage within the project area. Additionally, the roadway will be reconstructed. This reconstruction will include the complete removal and replacement of the existing roadway, the installation of ribbon curbs (concrete shoulders), repair of driveway aprons, and parkway/ditch restoration with sod.

P.T. Ferro Construction of Joliet, IL will be the general contractor. Mr. Ed Mijares of Baxter & Woodman Engineering will be the Village of Orland Park's on-site representative. He will facilitate the Village's quality control program and monitor construction operations.

Weather permitting, during the week of August 15, 2016, Baxter and Woodman will be performing survey work. Construction activities will begin during the week of August 22, 2016. The contractor will install traffic and erosion control devices and will begin construction by installing driveway culverts. Construction materials will also be delivered to the site during this time. The roadway work is anticipated to start after the Labor Day Holiday (September 6<sup>th</sup>).

**Please be aware vehicular access to and from your property and driveways will be limited at times and you may be asked to park around the corner or on the next block. If you have special needs that require uninterrupted vehicle access to your home, please contact Ed Mijares immediately before construction begins.**

Prior to construction, property owners are asked to remove personal property from the Village right-of-way (typically the area between the roadway and up to 15 feet into the parkway. This includes large boulders, planting beds, railroad ties, decorative bricks and any other landscaping material. All personal property left in the right-of-way will be removed and discarded during construction. The Village will not assume liability for private property left in the Village right-of-way during construction.

**If you have an underground lawn sprinkler system, sump pump line, dog fence, or electrical wiring located in the Village right-of-way, please contact Mr. Mijares as soon as possible.**

John J. Ingram, Director of Public Works

School bus transportation will be affected by the construction project. Local school districts have been notified and are making the appropriate accommodations. Please contact your School District directly regarding school bus related issues.

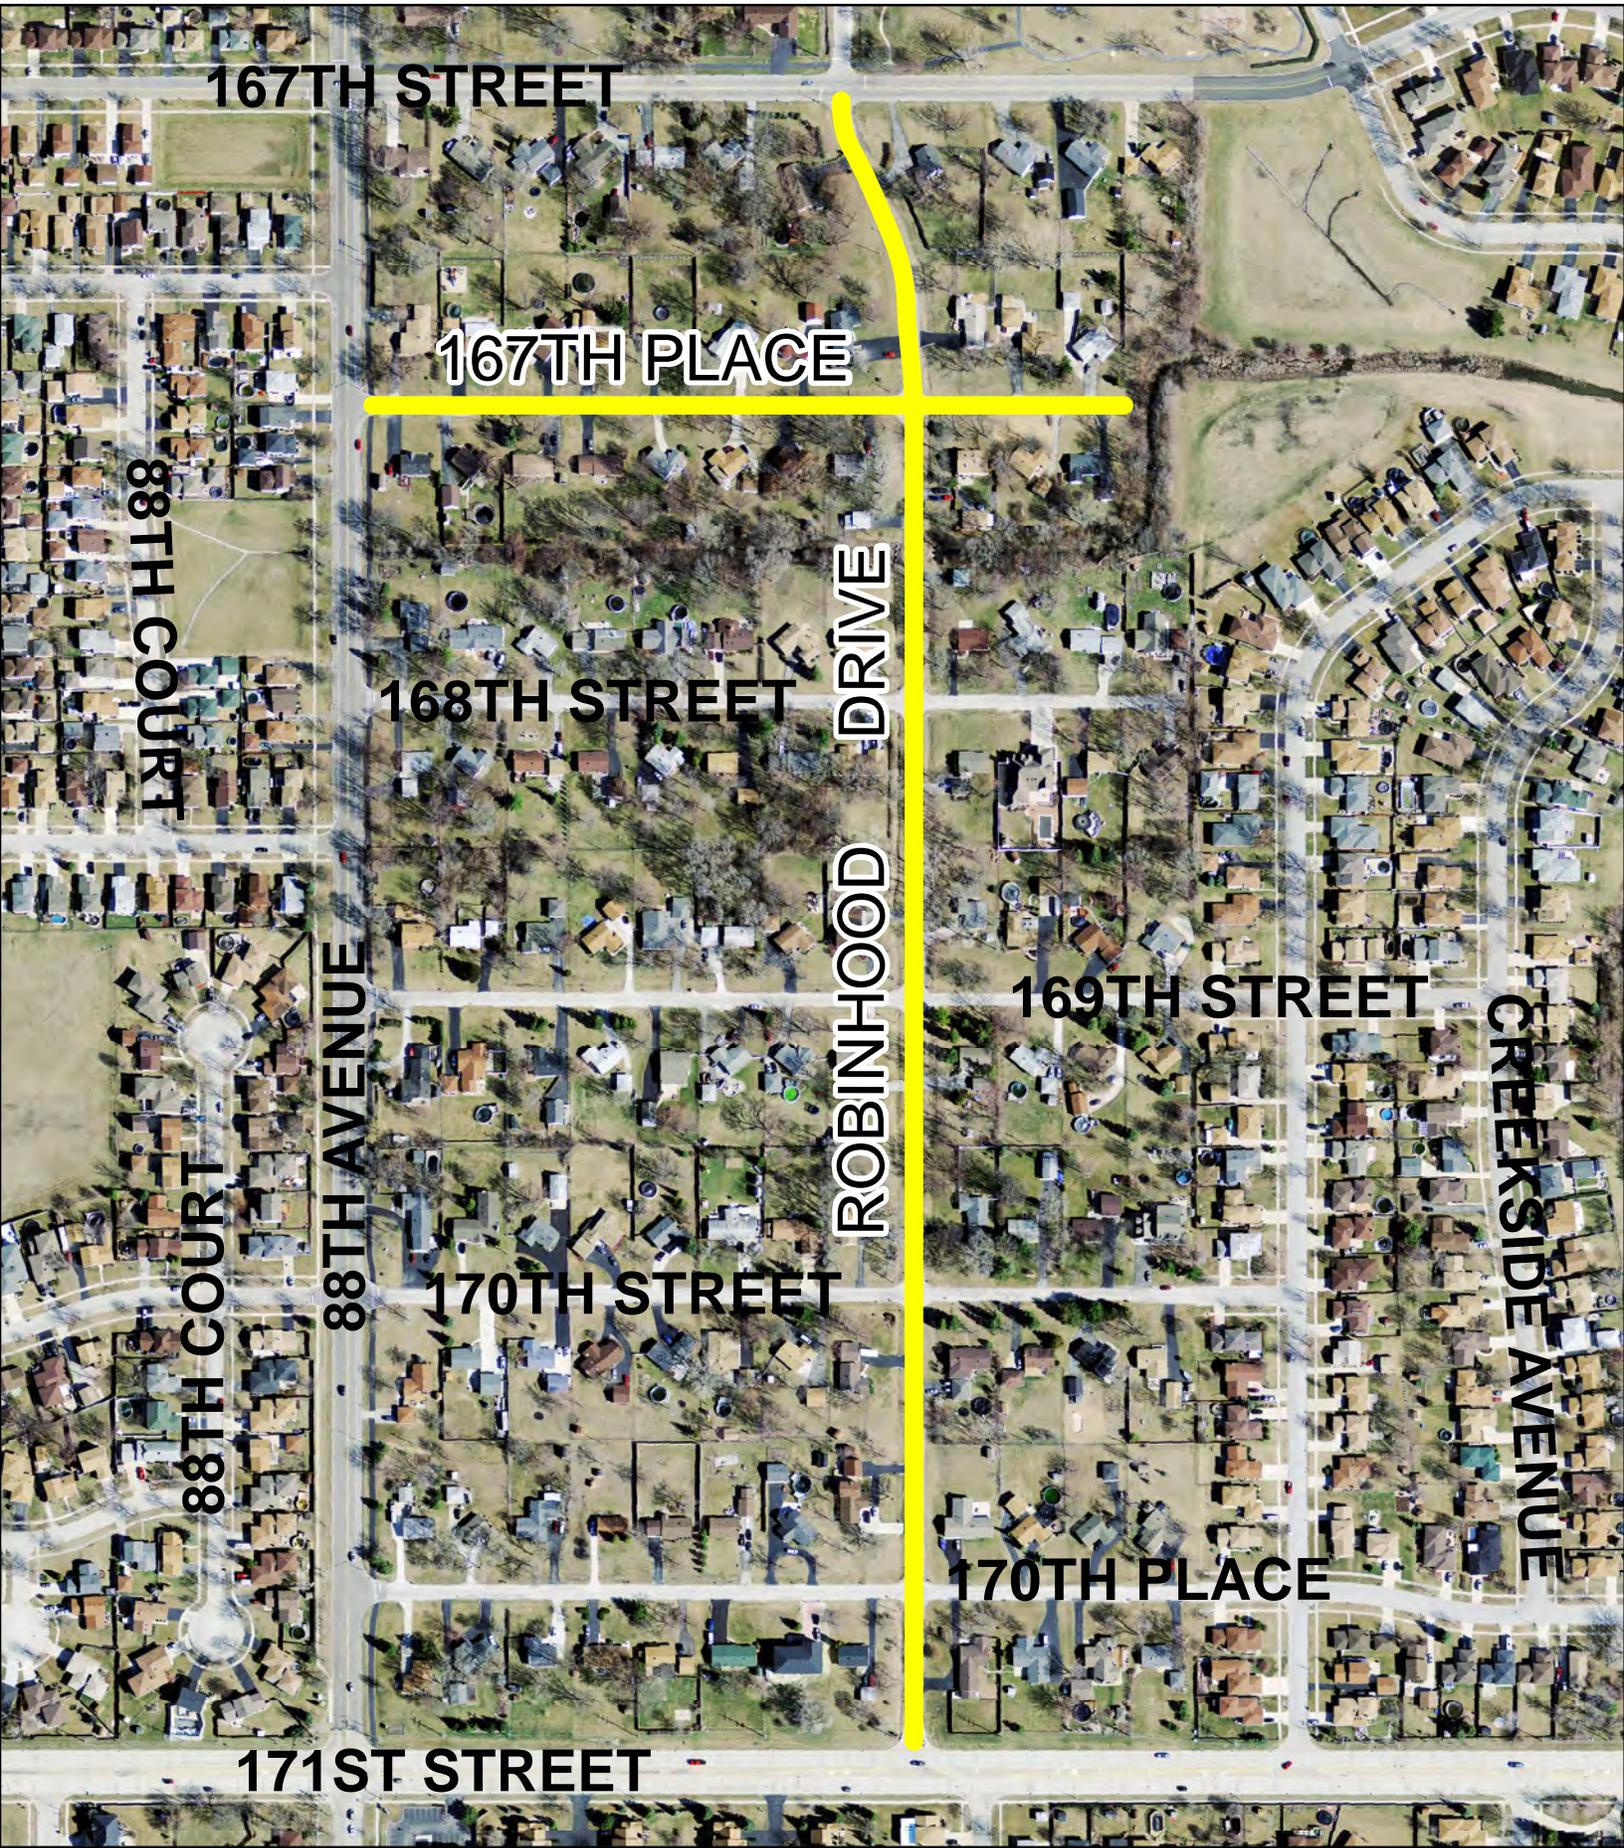

Please contact and/or leave a message for Mr. Mijares at: 708-403-6350. General questions and comments can also be forwarded to the Village of Orland Park at 708-403-6350.

Thank you for your continued patience.

Sincerely,

A handwritten signature in cursive script, appearing to read "John J. Ingram".
